

UI/UX PROJECT REPORT

GameHub

A Scalable Gaming Information Architecture

| Project Vision & Goals

The goal was to create a modern gaming portal that facilitates high-speed information retrieval for gamers.

</> Built with **Bootstrap 5.3.3** for layout stability.

📄 Total of 4 core pages + dynamic game entries.

📱 Full responsiveness across all modern browsers.

| User Profiling & Research

Observation

Observed that users struggle with cluttered "ad-heavy" gaming blogs. Need for a "hub" style.

Interviews

Primary target: Gamers (15-45). They value "Official Specs" and "Aggregated Scores" over fluff.

Surveys

Survey results showed a 90% preference for Dark Mode in high-focus gaming environments.

| Visibility & Psychological Principles

Clarity in Information

Following the principle of **Visibility**, we implemented high-contrast score badges.

- ★ Star ratings provide instant quality assessment.
- 🏆 Success badges (bg-success) highlight top-tier scores (e.g., 9.8/10).
- 👁️ Clear hierarchy from Hero titles to Card bodies.

UX principles abstract icons

| Affordance & Interaction

Affordance

Buttons like **Explore Games** use size and color to invite interaction.

Feedback

Bootstrap **Hover effects** on cards and nav-links give users immediate tactile confirmation.

Form Controls

Input fields in the Contact page use focus-rings to indicate active text entry state.

Design Principle: Simplicity

We avoided visual overload by using the **Hero Layout**. It allows for a single, powerful "call-to-action" that guides the user to the core experience.

Minimalist Typography using Urbanist.

White space between game cards to prevent cognitive fatigue.

Flat UI elements to maintain a professional look.

Design Principle: Consistency

Element	Standard Implementation	Role in Consistency
Navbar	bg-dark navbar-expand-lg	Uniform navigation across all pages.
Footer	bg-dark text-white p-4	Consistent branding and social links.
Card Header	h5 class="card-title"	Identical text sizing for all game titles.
Themes	css/style.css	Global color variables for dark mode.

| Homepage Architecture

The Hero Experience

The **index.html** welcomes users with a lead paragraph and a primary button. It acts as the gateway to the library.

Followed by a **Popular Games** section that utilizes the Bootstrap Grid (row/col-md-4) to showcase featured content.

| The Game Library System

Library Grid

Utilizes col-md-4 cards to display 6+ titles (GTA VI, RDR2, Witcher 3, etc.) simultaneously.

Card-Image-Top

Ensures visual dominance. Every game card follows a strict "Image -> Title -> Desc -> Button" order.

Deep Linking

Buttons like "View Details" provide direct paths to specific game data pages (e.g. gta6.html).

| Detailed Reviews & Scoring

The **reviews.html** uses horizontal cards (row g-0) to allow for longer descriptive text alongside game images.

Game Title	User Rating	Score Badge	Summary Snippet
Witcher 3	★★★★★	9.9 / 10	Masterpiece of narrative RPGs.
Elden Ring	★★★★★	9.8 / 10	Intense combat and deep lore.
Cyberpunk	★★★★	8.5 / 10	Futuristic RPG in Night City.

User Interaction & Contact

The contact page ensures **Tolerance** by providing a structured form. Even if users fill it incorrectly, Bootstrap's form-control styling guides the input process.

- ✉ Professional Email gathering.
- ➦ "Send Message" primary CTA.
- # Social media footer integration.

Questions?

THANK YOU FOR YOUR ATTENTION
